

POOL MAINTENANCE

1. **Pump** must be run **10 - 12 hours per day**, every day.
2. **Vacuum** any dirt and debris whenever it is needed.
3. **Keep filter clean.** If filter pressure rises 10 - 15 lbs. more than your start-up pressure, **backwash your sand filter** or **change Diatomaceous Earth** as directed on your filter.
4. Weekly or as needed - **clean out baskets** in both your **skimmer** and **pump**.
5. **To vac your pool** always **fill the vac hose with water** before attaching to the skimmer.
6. **Solar Covers** - Whenever the solar cover is off the pool, cover it with white plastic sheet to prolong the life of the cover.
7. **Keep the water level** topped off for proper operation.
8. **Bring water sample in once a month** for complete water testing.
