

POOL WEEKLY CHEMISTRY

1. **Test water** at least twice a week.
2. **Maintain** total alkalinity at 100 - 150 ppm. Use **Balance Pak 100** to raise alkalinity; 1 ½ lbs. per 10,000 gal to raise 10 PPM.
3. **Maintain** PH at 7.2 - 7.6. Use **Balance Pak 200** to *raise* PH, 1 lb. per 10,000 gallons and use **Lo'N Slo** to *lower* PH according to label.
4. **Maintain** chlorine level at 1-3 PPM.
5. Add **Smart Sticks** once a week; 1 per 5,000 gallons to your skimmer.
6. Add **Back up Algae Inhibitor**: 2 oz. per 5,000 gallons every other week or 1oz. per 5,000 gallons every week. (Do not add after shocking.) Wait 15 min.
7. Add **Smart Shock**: 1 lb. per 12,000 gallons. (Never pour onto Smart Sticks.)
8. **Bring water sample in once a month** for complete water testing.

Your Pool Size: _____

_____ **Gallons**

***Note:** *WAIT 24 hours after shocking to add other chemicals.
*NEVER mix any chemicals.
